

Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 public class Debug4 {  
2     static int calculate(int a, int b) {  
3         try {  
4             return a / b;  
5         } catch (ArithmeticException e) {  
6             System.out.println("Division by Zero");  
7             return 0;  
8         } finally {  
9             System.out.println("Resources Released");  
10        }  
11    }  
12    public static void main(String args[]) {  
13        System.out.println(calculate(20, 0));  
14    }  
15 }
```

Test Input

20
0

Output

Division by Zero
Resources Released
0

Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 import java.util.Scanner;
2
3 public class Debug4 {
4     public static void main(String[] args) {
5         Scanner scanner = new Scanner(System.in);
6
7         if (!scanner.hasNext()) {
8             System.out.println("String is Null");
9             return;
10        }
11
12        String name = scanner.next();
13
14
15        if (name.equals("null")) {
16            System.out.println("String is Null");
17        } else {
18            System.out.println("Length = " + name.length());
19        }
20
21        scanner.close();
22    }
23 }
```

Test Input

java

Output

Length = 4

xx Debugging task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 import java.util.Scanner;
2 class Calculator {
3     static int divide(int a, int b) {
4         return a / b;
5     }
6     static void display(int x) {
7         System.out.println("Answer = " + x);
8     }
9     static void displayZero() {
10        System.out.println("Cannot Divide by Zero");
11    }
12 }
13 public class Debug2 {
14     public static void main(String args[]) {
15         Scanner sc = new Scanner(System.in);
16         try {
17             int a = sc.nextInt();
18             int b = sc.nextInt();
19             int result = Calculator.divide(a, b);
20             Calculator.display(result);
21         } catch (ArithmeticException e) {
22             Calculator.displayZero();
23         } finally {
24             // ...
25         }
26     }
27 }
```

Test Input
